

## System Help

When you start the program, the initial menu will be displayed on the screen, where you must choose a language (Spanish/English) to continue to the submenus of each language. Additionally, you have the option to exit the program, which will display an exit message.

When you choose a language, the main submenu will be displayed on the screen, where you will have access to different system functions, such as:

### **1. Magazine: Nube de Firewall:**

When you enter option 1, a submenu will open in which you can enter all the specific contents of the Nube de Firewall magazine (different articles, where when you select, a PDF will open so that they can be viewed) and the option to return to the language menu.

### **2. System Help:**

When you select, the PDF will open with instructions on the program.

### **3. Algorithm Calculator:**

When you select, an application (.exe) will open where the menu to perform calculations of 3 types of algorithms will be displayed.

### **4. Link to the members' videos:**

When you select this, the explanatory video about the code made by one of the students will automatically play

### **5. Credits:**

Selecting this will automatically open a PDF containing the participants of this project.

### **6. Game: THE HANGMAN:**

When you select this, an application (.exe) will open where the menu to start participating in the game "THE HANGMAN" will be displayed

### **7. Return to the language menu:**

When you select this, you will return to the main menu, where you can choose another language, or exit the application language.

All these parameters apply to both options, both in English and Spanish.
